*To the Lighthouse* Virginia Woolf 2021-06-24 Described by Virginia Woolf herself as 'easily the best of my books', and by her husband Leonard as a 'masterpiece', *To the Lighthouse*, first published in 1927, is one of the milestones of Modernism. Set on the Isle of Skye, over a decade spanning the First World War, the narrative centres on the Ramsay family, and is framed by Mrs Ramsay's promise to take a trip to the lighthouse the next day – a promise which isn't to be fulfilled for a decade. Flowing from character to character and from year to year, the novel paints a moving portrait of love, loss and perception. Bearing

all the hallmarks of Woolf's prose, with her delicate handling of the complexities of human relationships, *To the Lighthouse* has earned its reputation – frequently appearing in lists of the best novels of the twentieth century, it has lost not an iota of brilliance.

**Salt Sugar Fat** Michael Moss  
2013-02-26 From a Pulitzer Prize-winning investigative reporter at *The New York Times* comes the troubling story of the rise of the processed food industry -- and how it used salt, sugar, and fat to addict us. *Salt Sugar Fat* is a journey into the highly secretive world of the processed food giants, and the story of how they have deployed these three essential ingredients, over the past five decades, to dominate the North American diet. This is an eye-opening book that demonstrates how the makers of these foods have chosen, time and again, to double down on their efforts to increase consumption and profits, gambling that consumers and regulators would never figure them out. With meticulous original reporting, access to confidential files and memos, and numerous sources from deep inside the industry, it shows how these companies have pushed ahead, despite their own misgivings (never aired publicly). *Salt Sugar Fat* is the story of how we got here, and it will hold the food giants accountable for the social costs that keep climbing even as some of the industry's own say, "Enough already."

**The Great Stink of London** Stephen Halliday 2001-02-15 In the sweltering summer of 1858 the stink of sewage from the polluted Thames was so offensive that it drove Members of Parliament from the chamber of the House of Commons. Sewage generated by a population of over two million Londoners was pouring into the river and was being carried to and fro by the tides. The Times called the crisis "The Great Stink". Parliament had to act - drastic measures were required to clean the Thames and to improve London's primitive system of sanitation. The great engineer entrusted by Parliament with this enormous task was Sir Joseph Bazalgette, and this book is a fascinating account of his life and work. Bazalgette's response to the challenge was to conceive and build the system of intercepting sewers,

pumping stations and treatment works that serves London to this day. In the process he cleansed the River Thames of the capital's sewage and helped to banish cholera, which in the mid-nineteenth century carried off over 40,000 Londoners. But this successful scheme was only one element in Bazalgette's wider contribution to the development of the Victorian capital. He also reclaimed land from the Thames to construct the Victoria, Albert and Chelsea Embankments, built bridges across the Thames at Putney, Battersea and Hammersmith, and created many notable new thoroughfares including Charing Cross Road, Northumberland Avenue and Shaftesbury Avenue. Stephen Halliday's enthralling social and personal history gives a vivid insight into Bazalgette's achievements and the era in which he worked and lived. The author traces the origins of Bazalgette's family in revolutionary France, the confusing sanitation system that he inherited from medieval and Tudor times and his heroic battle with politicians, bureaucrats and huge engineering problems to transform the face and health of the world's largest city.

**Edible Insects** Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. Edible insects are a promising alternative to the conventional production of meat, either for direct

human consumption or for indirect use as feedstock. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

**Ethnographic Research in the Construction Industry** Sarah Pink 2013

The construction industry as a workplace is commonly seen as problematic for a number of reasons, including its worrying health and safety record, the instability of its workforce, and the poorly regulated nature of the sector. It is surprising therefore, that the sector and its working practices remain so under-theorised. Now though, there is a growing interest in and awareness of the utility of an ethnographic approach to the construction industry. *Ethnographic Research in the Construction Industry* draws together in one volume a set of expert contributions which demonstrate how social science perspectives, rooted in ethnographic research on construction sites and with construction workers themselves, can generate fresh insights into the social, cultural and material ways that the industry and conditions of work in it are experienced and played out. Each chapter develops discussion on the basis of an ethnographic case study to examine how theoretically informed ethnographic research can help us understand industry problems, and can challenge common perceptions of the construction industry. This book will be of interest to students and scholars of anthropology, sociology, geography and organization studies, as well as those from the built environment and related applied fields.

Supplemental Nutrition Assistance  
Program National Research Council  
2013-05-23 For many Americans who  
live at or below the poverty  
threshold, access to healthy foods at  
a reasonable price is a challenge  
that often places a strain on already  
limited resources and may compel them  
to make food choices that are  
contrary to current nutritional  
guidance. To help alleviate this  
problem, the U.S. Department of  
Agriculture (USDA) administers a  
number of nutrition assistance  
programs designed to improve access  
to healthy foods for low-income  
individuals and households. The  
largest of these programs is the  
Supplemental Nutrition Assistance  
Program (SNAP), formerly called the  
Food Stamp Program, which today  
serves more than 46 million Americans

with a program cost in excess of \$75  
billion annually. The goals of SNAP  
include raising the level of  
nutrition among low-income households  
and maintaining adequate levels of  
nutrition by increasing the food  
purchasing power of low-income  
families. In response to questions  
about whether there are different  
ways to define the adequacy of SNAP  
allotments consistent with the  
program goals of improving food  
security and access to a healthy  
diet, USDA's Food and Nutrition  
Service (FNS) asked the Institute of  
Medicine (IOM) to conduct a study to  
examine the feasibility of defining  
the adequacy of SNAP allotments,  
specifically: the feasibility of  
establishing an objective, evidence-  
based, science-driven definition of  
the adequacy of SNAP allotments  
consistent with the program goals of  
improving food security and access to  
a healthy diet, as well as other  
relevant dimensions of adequacy; and  
data and analyses needed to support  
an evidence-based assessment of the  
adequacy of SNAP allotments.

Supplemental Nutrition Assistance  
Program: Examining the Evidence to  
Define Benefit Adequacy reviews the  
current evidence, including the peer-  
reviewed published literature and  
peer-reviewed government reports.  
Although not given equal weight with  
peer-reviewed publications, some non-  
peer-reviewed publications from  
nongovernmental organizations and  
stakeholder groups also were  
considered because they provided  
additional insight into the  
behavioral aspects of participation  
in nutrition assistance programs. In  
addition to its evidence review, the  
committee held a data gathering  
workshop that tapped a range of  
expertise relevant to its task.
