**Strange Labour** Robert Penner 2020-10-15 Strange Labour is a powerful meditation on the meaning of humanity in a universe that is indifferent to our extinction, and a provocative re-imagining of many of the tropes and clichés that have shaped the post-apocalyptic novel. Most people have deserted the cities and towns to work themselves to death in the construction of monumental earthworks. The only adults unaffected by this mysterious obsession are a dwindling population that live in the margins of a new society they cannot understand. Isolated, in an increasingly deserted landscape, living off the material remnants of the old order, trapped in antiquated habits and assumptions, they struggle to construct a meaningful life for themselves. Miranda, a young woman who travels across what had once been the West, meets Dave, who has peculiar theories about the apocalypse.

**Weaponomics: the global market for assault rifles** Phillip Killicoat 2007 Abstract: This paper introduces the first effort to quantitatively document the small arms market by collating field reports and journalist accounts to produce a cross-country time-series price index of Kalashnikov assault rifles. A model of the small arms market is developed and empirically estimated to identify the key determinants of assault rifle prices. Variables which proxy the effective height of trade barriers for illicit trade are consistently significant in determining weapon price variation. When controlling for other factors, the collapse of the Soviet Union does not have as large an impact on weapon prices as is generally believed.

**From Jailer to Jailed** Bernard B. Kerik 2015-03-31 The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

**The Great Suppression** Zachary Roth 2016 "Roth [examines] the deep historical roots of [what he sees as conservatives'] anti-egalitarian worldview, and introduces us to its modern-day proponents: the GOP officials pushing to make it harder to cast a ballot; the lawyers looking to scrap all limits on money in politics; the libertarian scholars reclaiming judicial activism to roll back the New Deal; and the corporate lobbyists working to ban local action on everything from the minimum wage to the environment"--

**Law: A Very Short Introduction** Raymond Wacks 2008-03-27 Law underlies our society - it protects our rights, imposes duties on each of us, and establishes a framework for the conduct of almost every social, political, and economic activity. The punishment of crime, compensation of the injured, and the enforcement of contracts are merely some of the tasks of a modern legal system. It also strives to achieve justice, promote freedom, and protect our security. The result is a system that, while it

touches all of our daily lives, is properly understood by only a few, with its impenetrable jargon, obsolete procedures, and interminable stream of Byzantine statutes and judgments of the courts. This clear, jargon-free Very Short Introduction aims to redress that balance, as it introduces the essentials of law and legal systems in a lively, accessible, and stimulating manner. Explaining the main concepts, terms, and processes of the legal system, it focuses on the Western tradition (the common law and the civil law), but also includes discussions of other legal systems, such as customary law and Islamic law. And it looks to the future too, as globalization and rapid advances in technology place increasing strain on our current legal system. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

**The M16** Gordon L. Rottman 2011-12-20 The M16 was first introduced in 1958 and was revolutionary for its time as it was made of lightweight materials including special aluminum and plastics. It was first adopted by US Special Forces and airborne troops in 1962 before it was issued to Army and Marine units serving in Vietnam. Its use spread throughout the following decades and a number of variants including submachine and carbine versions were also fielded. As a result it is now amongst the three most used combat cartridges in the world while over 10 million M16s and variants have been produced making it one of the most successful American handheld weapons in history. But despite its undeniable success the M16 is not without its detractors. Indeed, the "black rifle", as it is known, is one of the most controversial rifles ever introduced with a long history of design defects, ruggedness issues, cleaning difficulties and reliability problems leading to endless technical refinements. This volume provides a technical history of the M16 and the struggle to perfect it together with an assessment of its impact on the battlefield drawing on over a decade's combat experience with the rifle.

**Buried Alive** Myra Friedman 2011-04-27 Electrifying, highly acclaimed, and intensely personal, this new and updated version of Myra Friedman's classic biography of Janis Joplin teems with dramatic insights into Joplin's genius and into the chaotic times that catapulted her to fame as the legendary queen of rock. It is a stunning panorama of the turbulent decade when Joplin's was the rallying voice of a generation that lost itself in her music and found itself in her words. From her small hometown of Port Arthur, Texas, to San Francisco's Haight-Ashbury, from the intimate coffeehouses to the supercharged concert halls, from the glitter of worldwide fame to her tragic end in a Hollywood hotel, here is all the fire and anguish of an immortal, immensely talented, and troubled performer who devoured everything the rock scene had to offer in a fatal attempt to make peace with herself and her era. Yet, in an eloquent introduction recently written by the author, Joplin emerges from her "ugly duckling" childhood as a woman truly ahead of her time, an outrageous rebel, a defiant outcast and artist of incomparable authenticity who, almost in spite of herself, became to so many a symbol of triumph over adversity. This edition also contains an afterword detailing the whereabouts of a large and colorful cast of characters who were part of Joplin's life, as well as "We Remember Janis," a new chapter of poignant and affectionate anecdotes told by friends.

**Achtung-Panzer!** Heinz Guderian 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Blood Infernal** James Rollins 2015-02-10 In a masterpiece of supernatural mystery and apocalyptic prophecy, New York Times bestselling authors James Rollins and Rebecca Cantrell bring to a thunderous conclusion their epic trilogy of novels set between the worlds of shadow and light, between salvation and damnation, where the very gates of Hell must be shattered to discover the true fate of humankind in... Blood Infernal As an escalating scourge of grisly murders sweeps the globe, archaeologist Erin Granger must decipher the truth behind an immortal prophecy foretold in the Blood Gospel, a tome written by Christ and lost for centuries: The shackles of Lucifer have been loosened, and his Chalice remains lost. It will take the light of all three to forge the Chalice anew and banish him again to his eternal darkness. With the Apocalypse looming, Erin must again join forces with Army Sergeant Jordan Stone and Father Rhun Korza to search for a treasure lost for millennia. But the prize has already fallen into the hands of their enemy, a demon named Legion, before whom even the walls of the Vatican will fall. The search for the key to salvation will take Erin and the others across centuries and around the world, from the dusty shelves of the Vatican's secret archives to lost medieval laboratories, where ancient alchemies were employed to horrific ends. All the while, they are hunted, besieged by creatures of uncanny skill and talent. As clues are dug free from ancient underground chapels and found frozen in icy mountain caverns, one that will destroy not only her, but all she loves. To protect the world, Erin must walk through the very gates of Hell and face the darkest of enemies: Lucifer himself. With The Blood Gospel, the first novel in the Order of the Sanguines series, James Rollins and Rebecca Cantrell combined science, myth, and religion to introduce a breathtaking world where miracles hold new meaning and the fight for good over evil is far more complicated than we ever dreamed. And now, in this epic conclusion to the Sanguines trilogy, Blood Infernal, they take us to the very pit of Hell itself, making us peer into the abyss and face our greatest fears, to answer the ultimate question: What price will we pay for true salvation?

**McDonnell F2H-3/4** Steve Ginter 2012-01 The F2H-3/4 Banshee ("Big Banjo") was a direct outgrowth of the F2H-1 and F2H-2 series of Korean war fighter and recon jets (see Naval Fighters #73 Early Banshees). It became the US Navy's first single seat all-weather carrier interceptor. To satisfy its mission the F2H-3/4 was required to have a significant increase in range. To accomplish this the internal fuel capacity was more than doubled by stretching the fuselage by 8 feet 1.6 inches. This gave the F2H-3/4 a combat range with tip tanks of 1,490 nautical miles. In addition to the fuselage extension, the tail surfaces of the F2H-3/4 were also redesigned. The horizontal tail was moved down to the rear of the fuselage tail cone and given a 10 degree dihedral. To accommodate the enlarged radar unit the four nose-mounted cannons were moved aft along the lower fuselage sides. The difference in the F2H-3 and F2H-4 was in the radar. The F2H-3 used the Westinghouse APQ-41 with a 28" dish and the F2H-4 was equipped with the Hughes APG-37 radar. The F2H-4 further differs from the -3 by having up-rated J34-WE-38 engines. The larger engines allowed for a service ceiling of 56,000 ft. The aircraft also had increased wing stations and was capable of carrying Sidewinder air-to-air missiles. The aircraft were active with the Navy and Marines from 1952 through 1959. It was operated by 31 active Navy and Marine squadrons which histories appear in the book along with squadron

insignia. The book also includes a chapter on Royal Canadian F2H-3s.
