Bound in Twine Sterling D. Evans 2013-01-14

Before the invention of the combine, the binder was an essential harvesting implement that cut grain and bound the stalks in bundles tied with twine that could then be hand-gathered into shocks for threshing. Hundreds of thousands of farmers across the United States and Canada relied on binders and the twine required for the machine's operation. Implement manufacturers discovered that the best binder twine was made from henequen and sisal—spiny, fibrous plants native to the Yucatán Peninsula of Mexico. The double dependency that subsequently developed between Mexico and the Great Plains of the United States and Canada affected the agriculture, ecology, and economy of all three nations in ways that have historically been little understood. These interlocking dependencies—identified by author Sterling Evans as the “henequen-wheat complex”—initiated or furthered major ecological, social, and political changes in each of these agricultural regions. Drawing on extensive archival work as well as the existing secondary literature, Evans has woven an intricate story that will change our understanding of the complex, transnational history of the North American continent.

The Boy Who Changed the World Andy Andrews

2010-08-29 Did you know that what you do today can change the world forever? *The Boy Who Changed the World* opens with a young Norman Borlaug playing in his family's cornfields with his sisters. One day, Norman would grow up and use his knowledge of agriculture to save the lives of two billion people. Two billion! Norman changed the world! Or was it Henry Wallace who changed the world? Or maybe it was George Washington Carver? This engaging story reveals the incredible truth that everything we do matters! Based on *The Butterfly Effect*, Andy's timeless tale shows children that even the smallest of our actions can affect all of humanity.

The book is beautifully illustrated and shares the stories of Nobel Laureate Norman Borlaug, Vice President Henry Wallace, Inventor George Washington Carver, and Farmer Moses Carver. Through the stories of each, a different butterfly will appear. The book will end with a flourish of butterflies and a charge to the child that they, too, can be the boy or girl who changes the world.

Results Bruce A. Pasternack 2005-10-18 Every company has a personality. Does yours help or hinder your results? Does it make you fit for growth? Find out by taking the quiz that's helped 50,000 people better understand their organizations at OrgDNA.com and to learn more about Organizational DNA. Just as you can understand an individual's personality, so too can you understand a company's type—what makes it tick, what's good and bad about it. *Results* explains why some organizations bob and weave and roll with the punches to consistently deliver on commitments and produce great results, while others can't leave their corner of the ring without tripping on their own shoelaces. Gary Neilson and Bruce Pasternack help you identify which of the seven company types you work for—and how to keep what's good and fix what's wrong. You'll feel the shock of recognition (“That's me, that's my company”) as you find out whether your organization is:

- **Passive-Aggressive** (“everyone agrees, smiles, and nods, but nothing changes”): entrenched underground resistance makes getting anything done like trying to nail Jell-O to the wall
- **Fits-and-Starts** (“let 1,000 flowers bloom”): filled with smart people pulling in different directions
- **Outgrown** (“the good old days meet a brave new world”): reacts slowly to market developments, since it's too hard to run new ideas up the flagpole
- **Overmanaged** (“we're from corporate and we're here to help”): more reporting than working, as managers check on their subordinates' work so they can in turn report to their bosses
- **Just-in-Time** (“succeeding, but by the skin of our teeth”): can turn on a dime and create real breakthroughs but also tends to burn out its best and brightest
- **Military Precision** (“flying in formation”): executes brilliant strategies but usually does not deal well with events not in the playbook
