Family and Parenting Support UNICEF Innocenti Research Centre 2015-12-15 In keeping with the spirit of the Convention on the Rights of the Child, family and parenting support is increasingly recognized as an important part of national social policies and social investment packages aimed at reducing poverty, decreasing inequality and promoting positive parental and child well-being. Over the past 15 to 20 years, different models of family-related services have evolved in different parts of the world. Much less documented is what drives the development of national policies and programmes in low- and middle-income countries and how the provision of family and parenting support impacts on child and adolescent well-being in these contexts. The publication aims to build the evidence base on what kind of family and parenting support works, under what conditions and for whom in order to promote child well-being in different national contexts. Case studies are included from: Belarus, Chile, China, Croatia, England, Jamaica, The Philippines, South Africa, and Sweden.

Skills Training for Struggling Kids Michael L.

Bloomquist 2012-11-29 Challenging kids don't behave badly on purpose -- they are simply struggling to "catch up" in key areas of psychological and cognitive development. If your child or teen's emotional or behavioral difficulties are getting in the way of success at home, at school, or in social situations, this is the book for you. Dr. Michael Bloomquist has spent decades helping parents to understand acting-out kids and support their healthy development. In these pages, he presents tried-and-true ways you can build your 5- to 17-year-old's skills to: *Follow rules and behave honestly. *Curb angry outbursts. *Make and maintain friendships. *Express feelings productively. *Stay on task at school. *Resolve conflicts with siblings. *Manage stress. Loads of checklists, worksheets, and troubleshooting tips help you select and implement the strategies that meet your child's specific needs. You'll also build your own skills for parenting effectively when the going gets tough. Systematic, compassionate, and practical, the book is grounded in state-of-the-art research. The road to positive changes for your child and family starts here. Mental health professionals, see also the related title *The Practitioner Guide to Skills Training for Struggling Kids*.

Fostering Grit Thomas R. Hoerr 2013-08-15 For too long,

educators have focused only on getting students ready for the next test, for the next grade, for graduation, or maybe for college. Students must be prepared to succeed in school, and they must know how to read, write, and calculate. But that's only the beginning. Our job--whether we teach kindergarten, 5th grade, or high school or we lead a school or district--is to prepare students for success in the real world. To do so, we must also teach grit. Grit is a combination of tenacity and perseverance--a willingness to take risks even if it means sometimes failing and starting again. Knowing how to respond to frustration and failure is essential whether a student struggles or excels. Veteran school leader and popular Educational Leadership columnist Thomas R. Hoerr shows what teaching for grit looks like and provides a sample lesson plan and self-assessments, along with a six-step process applicable across grade levels and content areas to help students build skills they need to succeed in school and in life.

Age of Opportunity Laurence Steinberg 2014-09-09 A leading expert on adolescence cites new research and describes how to raise happy, successful kids by helping parents navigate this challenging, but developmentally crucial, time through strategies that instill self-control during the teenage years. 25,000 first printing.
Neuroparenting Jan Macvarish 2016-09-20 This book traces the growing influence of 'neuroparenting' in British policy and politics. Neuroparenting advocates claim that all parents require training, especially in how their baby's brain develops. Taking issue with the claims that 'the first years last forever' and that infancy is a 'critical period' during which parents must strive ever harder to 'stimulate' their baby's brain just to achieve normal development, the author offers a trenchant and incisive case against the experts who claim to know best and in favour of the privacy, intimacy and autonomy which makes family life worth living. The book will be of interest to students and scholars of Sociology, Family and Intimate Life, Cultural Studies, Neuroscience, Social Policy and Child Development, as well as individuals with an interest in family policy-making.

The Parent's Handbook Don C. Dinkmeyer, Sr. 1997 One of the country's most popular parenting guides. Helps parents meet the challenges of raising a family today. The Parent's Handbook shows parents how they can become more knowledgeable, confident and successful in relating to their children. Discusses misbehavior, communication, encouragement, natural and logical consequences, family meetings, drug and alcohol abuse prevention. The STEP approach to parenting is based on the belief that every child and every parent has equal human worth and dignity. All are entitled to mutual respect. The system of discipline taught in STEP stresses this type of relationship. The authors believe that parents should provide opportunities for children to make decisions, within limits, allowing children to be responsible for their decisions. Other skills that are taught: identifying the four goals of misbehavior understanding beliefs and feelings encouraging your child and yourself reflective listening and I messages helping children cooperate discipline that makes sense Each chapter has activities titled "This Week", "Just for You" and "For Your Family". When you study and apply the STEP ideas, you are on your way to becoming a more effective parent, building a happy home. There is a Spanish edition of this book available: Guía para los padres.

The Incredible Years Training Series Carolyn Webster-Stratton 2000

Parenting Matters National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Effects of Systematic Training for Effective Parenting-teen to Reduce Parental Stress Barbara E. Baker 2001

What Works with Teens Britt H. Rathbone 2015-04-01 Two clinical social workers offer clinicians, educators, coaches, and other youth counselors the first professional book that focuses on engaging authentically with teens in order to create lasting change. Anyone who works with teens should read this book. If you work with teens, you know they are notoriously challenging to communicate with. And when teens are resistant to help, they may respond by acting defiant, guarded, defensive, rude, or even outright hostile. In turn, you may respond by reasserting your authority—resulting in an endless power struggle. So how can you break the cycle and start connecting? In *What Works with Teens*, you'll discover the core skills that research shows underlie all effective work with teens. You'll learn how to engage authentically with teens, create an atmosphere of mutual respect, and use humor to establish a deeper connection. Many books offer evidence-based approaches to treating teens, but very little information on how to establish and maintain a productive working relationship. This is the first trans-therapeutic book to provide real tools for creating a positive relationship with teens to help bolster effective treatment. Whether your background is in cognitive behavioral therapy (CBT), dialectical behavior therapy (DBT), acceptance and commitment therapy (ACT), psychotherapy, or any other treatment background, if you are looking for more effective ways to connect with teens and are ready for a program that really works, this book is a vital addition to your professional library.

The Formula Ronald F. Ferguson 2019-02-05 We all want our children to reach their fullest potential—to be smart and well adjusted, and to make a difference in the world. We wonder why, for some people, success seems to come so naturally. Could the secret be how they were parented? This book unveils how parenting helped shape some of the most fascinating people you will ever encounter, by doing things that almost any parent can do. You don't have to be wealthy or influential to ensure your child reaches their greatest potential. What you do need is commitment—and the strategies outlined in this book. In *The Formula: Unlocking the Secrets to Raising Highly Successful Children*, Harvard economist Ronald Ferguson, named in a *New York Times* profile as the foremost expert on the US educational "achievement gap," along with award-winning journalist Tatsha Robertson, reveal an intriguing blueprint for helping children from all types of backgrounds become successful adults. Informed by hundreds of interviews, the book includes never-before-published insights from the "How I was Parented Project" at Harvard University, which draws on the varying life experiences of 120 Harvard students. Ferguson and Robertson have isolated a pattern with eight roles of the "Master Parent" that make up the Formula: the Early Learning Partner, the Flight Engineer, the Fixer, the Revealer, the Philosopher, the Model, the Negotiator, and the GPS Navigational Voice. The Formula combines the latest scientific research on child development, learning, and brain growth and illustrates with life stories of extraordinary individuals—from the Harvard-educated Ghanian entrepreneur who, as the young child of a rural doctor, was welcomed in his father's secretive late-night political meetings; to the nation's youngest state-wide elected official, whose hardworking father taught him math and science during grueling days on the family farm in Kentucky; to the DREAMer immigration lawyer whose low-wage mother pawned her wedding ring to buy her academically outstanding child a special flute. The Formula reveals strategies on how you—regardless of race, class, or background—can help your children become the best they can be and shows ways to maximize their chances for happy and purposeful lives.

STEP/teen, Systematic Training for Effective Parenting of Teens Don C. Dinkmeyer 1983

The Leader's Guide Don C. Dinkmeyer 1983

Parent Management Training Alan E. Kazdin 2008-12-01 Among evidence-based therapies for children and adolescents with oppositional, aggressive, and antisocial behavior, parent management training (PMT) is without peer; no other treatment for children has been as thoroughly investigated and as widely applied. Here, Alan E. Kazdin brings together the conceptual and empirical bases underlying PMT with discussions of background, principles, and concepts, supplemented with concrete examples of the ways therapists should interact with parents and children. The second half of the book is a PMT treatment manual. The manual details the particulars of the therapy: what is done to and by whom, what the therapist should say, and what to expect at each stage of treatment. It also contains handouts, charts, and aides for parents. A companion website (www.oup.com/us/pmt) provides additional resources for clinicians.

The Science of Adolescent Risk-Taking National Research Council 2011-02-25 Adolescence is a time when youth make decisions, both good and bad, that have consequences for the rest of their lives. Some of these decisions put them at risk of lifelong health problems, injury, or death. The Institute of Medicine held three public workshops between 2008 and 2009 to provide a venue for researchers, health care providers, and community leaders to discuss strategies to improve adolescent health.

The Kazdin Method for Parenting the Defiant Child Alan

The Encouragement Book Don C. Dinkmeyer 1991 The Encouragement Book is about fulfilling potential. It is about motivating a child to learn, an employee to become more efficient and effective, loved ones and friends to achieve their goals. Readers learn how to utilize proven psychological and emotional techniques to: improve their powers of perception and communication; identify individual assets and strengths; and much more.

SOS Help for Parents Lynn Clark 1996-01-01 This second edition of "SOS" provides parents with guidance for handling a variety of common behavior problems based on the behavior approach to child rearing and discipline. This approach suggests that good and bad behavior are both learned and can be changed, and proposes specific methods, skills, procedures, and strategies for parents to use in getting improved behavior from their children. The guide is divided into four sections. Section 1 presents some fundamentals of child behavior and effective discipline. Some of the causes of children's misbehavior are examined as well as ways of increasing good behavior and eliminating bad ones. Section 2 provides advice for implementing the "time-out" method. Section 3 gives suggestions on how to: (1) manage bad behavior away from home; (2) use points, tokens, and contracts; (3) use time-out on two children at the same time; (4) use time-out on a toy instead of the child; (5) handle aggressive and dangerous behavior; and (6) help children express feelings. Section 4 suggests some additional resources for helping children. Each chapter includes a review of the most important ideas and instructions presented. The book's two appendices include an index of problem behaviors, quizzes and answers for parents, more resources for professionals, and tear-out sheets for parents and teachers.

Approximately 60 references are included. A videotape, not available from ERIC, demonstrates the child-rearing rules, and errors to avoid, as well as other child management methods. A printed "Video Leader's Guide" for the training leaders provides objectives, suggested outlines for workshops, and guidelines for discussing the behavior vignettes in the video. Workshop evaluation

forms and handouts are appended. A parent audio cassette on how to use "time out" effectively is also part of this multimedia package. (HTH)

The Ten Basic Principles of Good Parenting Laurence Steinberg 2005-05-09 A guide to raising children covers the principles of adapting a parenting style to match a particular child's needs, establishing a structure and limits, and promoting such qualities as honesty, kindness, and independence.

Defiant Teens, Second Edition Russell A. Barkley 2014-04-02 This authoritative manual presents an accessible 18-step program widely used by clinicians working with challenging teens. Steps 1-9 comprise parent training strategies for managing a broad range of problem behaviors, including those linked to oppositional defiant disorder (ODD) and attention-deficit/hyperactivity disorder (ADHD). Steps 10-18 focus on teaching all family members to negotiate, communicate, and problem-solve more effectively, while facilitating adolescents' individuation and autonomy. Practical reproducible handouts and forms are included; the print book has a large-size format and lay-flat binding to facilitate photocopying. Purchasers also get access to a Web page where they can download and print the reproducible materials. New to This Edition

- *Incorporates 15 years of research advances and the authors' ongoing clinical experience.
- *Fully updated model of the nature and causes of ODD.
- *Revised assessment tools and recommendations.
- *Reflects cultural changes, such as teens' growing technology use. See also the authors' related parent guide, *Your Defiant Teen, Second Edition: 10 Steps to Resolve Conflict and Rebuild Your Relationship*, an ideal client recommendation. Family Violence Mildred Daley Pagelow 1984 "Mildred Pagelow's *Family Violence* . . . is a liberal rather than radical book. Pagelow believes that experts on family violence must have 'an underlying faith in the goodness of people,' since 'there will always be a majority of people who struggle against violence.' . . . Her book is encyclopedic in its coverage, presenting the data on the extent of the problem of family violence, various perspectives and explanations for family violence, child abuse and neglect, spouse abuse, other kinds of abuse, including children abusing other children and abuse of elderly parents." *Women's Review of Books*
